OUTBREAK!

Globalists, China and media selling us fear

Exclusive: Hanne Nabintu Herland warns, 'Let us take down the coronavirus, not our economies'

The following analysis is based on the hypothesis that American globalists ended up joining the U.S.-China trade war, helping China push even more media fear of corona, simply to try to harm President Trump – since Russia-gate, impeachment nor anything else has worked. The horrendous outcomes may have been unanticipated, but the results remain the same.

The United States is locked in an economic civil war over who is to own the country, its assets and global trade. President Trump has, from the beginning, spoken of national interest, jobs returning to American workers, internationalist corporations paying taxes again, halting the monopoly structures that quench local businesses, reinstating honor for the Constitution with its profound respect for Judeo-Christian values – and fair trade with China.

The globalist model of acquiring the world's wealth in the hands of the top elite was at stake from the very second Trump was chosen. The globalists, who also own the media, have attempted for years to remove Trump. By fueling the media with fear, yet another attempt on Trump is on the way.

In the 2020 financial meltdown, it seems that the globalists have joined China in attacking the U.S. economy.

This is the new chapter in the U.S.-China trade war, with empty shelves all across the West soon to be filled by Chinese products. It is a government-ordered shutdown of the Western economy, not determined by lack of demand. The West is under siege by a cunning enemy.

The current economic crisis has three components:

1. The falling oil price due to the slowing down of the Chinese economy. Russia's "no" to OPEC+ took a hit at U.S. shale oil and helped spur low oil prices, on which the rise of China is dependent. Saudi Arabia is increasing its production with China as the main customer.
2. The fear of death from the coronavirus-caused COVID-19.
3. The enhancing of this fear coming from the globalist owners of the Western media in order to finally "get to Trump."

A short summary: 650 000 people die yearly of a regular influenza, according to the World Health Organization. The U.S. numbers for yearly deaths due to regular flus are, as CNN reported in 2018, around 80 000.

Compared to Chinese numbers from coronavirus, the 2018 U.S. influenza was much more "pandemic." Yet, no media pumped that story up back then. In Italy, which has Europe's oldest population, thousands die yearly from flus – 68,000 died of various flus between 2013-2017, according to one study. Over 5 million got the illness. We never heard much about that.

The average age of those dying from COVID-19 is 79.5 years old, 70% men, most of whom have two or three other serious diagnoses, according to steigan.no.

Israel, with its well-informed intelligence, took the correct response by reducing the panic, isolating its elderly and those prone to respiratory

illnesses, implementing social distance while the national economy continued. South Korea seems to have beaten the virus, demonstrating its discipline and collective approach by implementing social distance, protecting the elderly and business carrying on. Let us take down the coronavirus, not our economies.

As the Chinese markets fell due to the outbreak, stocks plunged, and the China government allegedly responded by buying up stocks and nationalizing assets. Allegedly, they are now doing the same in the Wall Street market crash.

It was at this point that President Xi Jinping used the term "a devil" about the virus. Those who have studied Confucianism know exactly what it implies pertaining to Chinese fury. "Xi's terminology is a major clue. He said, on the record, that this was war. And, as a counterattack, a 'people's war' had to be launched," writes Pepe Escobar.

This was right after President Trump signed the fair trade agreement with China back in January, correcting currency manipulation and violations of intellectual property laws. The Chinese may have felt that they lost face. Two weeks later, news of the virus erupted amid record low unemployment in the United States – much to the distress of CNN, which has tried to crush Trump for years.

Ironically, CNN now confirms the massive Trump gains since he took office, the same gains CNN formerly denied, only now in order to demonstrate how the market crash hurts Trump. It is remarkable how undisclosed intentions are on display in the current American mainstream media. They are still happy to hurt Trump, even if it takes the whole country down?

Watch Hanne's interview with Dr. Paul Craig Roberts, one of America's leading political economists:

Financial Crisis - Paul Craig Roberts, Herland Report...

Dear WND Reader,

As America's political and culture wars rage, another battle is taking place in the news media.

Google, Facebook and the rest of Big Tech blatantly suppress Christian-conservative content while vacuuming up 90% of the advertising that once supported online news. It's a tough time for truth-oriented journalism.

WND, the nation's oldest independent news site and largest Christian website, is a rare combination of experienced professional journalists AND strong Judeo-Christian worldview. And we know most Americans—often portrayed as “ignorant hicks” and “bigots” living in flyover country—share our pro-American values and want real news, accurate information and insightful analysis on today's crucial issues.

That's what WND has delivered since 1997, all for free—no paywalls—an increasing rarity in the online news world.

Instead, we rely on the voluntary contributions of appreciative readers like you—now more than ever.

If you value WND, please make a donation in any amount to keep us alive and well. In so doing, you'll be keeping the First Amendment and American freedom alive as well!
