## HORRORS CONFIRMED: Obama's FDA purchased "fresh and never frozen" aborted baby heads and other body parts

A Freedom of Information Act (FOIA) case filed by the government watchdog group Judicial Watch **has revealed** that the U.S. Food and Drug Administration (FDA) under Barack Hussein Obama purchased the heads and other body parts of murdered (aborted) unborn human babies in order to conduct "research." The FDA claimed that the aborted baby body parts were for a "humanized mice" project that involved experimenting with "human fetal heads, organs and tissues," according to 198 pages of now-extracted FDA records. These "supplies" came from a biotechnology company called Advanced Bioscience Resources (ABR). ABR employee Perrin Lawton reportedly conducted the business deals with the help of FDA officer Kristina Howard, according to unearthed documents. A lawsuit filed by Judicial Watch

sought the records for "all contracts and related documentation on disbursement of funds, procedural documents and communications between FDA and ABR for the provision of human fetal tissue to be used in humanized mice research." A federal court responded by ordering that the government provide even more details about the purchase of these human body parts, "including 'line item prices,' or the price per organ the government paid to ABR," Judicial Watch announced about the ongoing case. "The court also found 'there is reason to question' whether the transactions violate federal law barring the sale of fetal organs. Documents previously uncovered in this lawsuit show that the federal government demanded the purchased fetal organs be 'fresh and never frozen,'" Judicial Watch added in a statement.

## **Baby murder is big money in America**

In 2012, right after Obama had been reelected for his second term, an agreement was made between the FDA and ABR to transact "\$12,000 worth of 'tissue procurement for humanized mice.'" That transaction ended up costing some \$60,000 when all was said and done. In some cases, aborted baby body parts came at a rate of \$230 per "tissue," with two per box plus shipping. The delivery of "fetal livers and thymuses," meanwhile, cost a bit more at \$580 a "set," with some of the more "premium" organs costing \$685 a pop. To obtain an "intact calvarium," which is just a fancy word for an uncrushed baby's skull, the FDA was billed \$515 each by ABR. "The HM [humanized mice] are created by surgical implantations of human tissue into mice that have multiple genetic mutations that block the development of the mouse immune system at a very early stage," a government researcher reportedly told ABR at the time. "The absence of the mouse immune system allows the human tissues to grow and develop into functional human tissues ... In order for the humanization to proceed correctly we need to obtain fetal tissue with a specific set of specialized characteristics." Obtusely, Obama actually had the gall to get up in front of the world and condemn this type of medical experimentation with aborted baby body parts – *in Africa*, anyway. You read that right: Obama expressed opposition to the chopping up of human babies for the purpose of doing "Frankenstein" experiments on them, but only in Africa. Here in the United States, he *oversaw* this very same wickedness, which was funded with American taxpayer dollars. "Chopping up aborted human beings for their organs and tissue is a moral and legal outrage," says Judicial Watch President Tom Fitton. "This issue should be front and center in any debate about America's barbaric abortion industry." Last year, Judicial Watch reported on how the National Institute of Health (NIH), where Tony Fauci works, has been doing much the same thing via the *University of Pittsburgh*, which has since been outed as one of the major "tissue hubs" where aborted baby body parts are processed and sold for profit.
