

# Documents expose US biological experiments on allied soldiers in Ukraine and Georgia

By Dilyana Gaytandzhieva - January 25, 2022

The US Defense Threat Reduction Agency (DTRA) program in the Republic of Georgia. Photo: Ministry of Internal Affairs of Georgia

While the US is planning to increase its military presence in Eastern Europe to "protect its allies against Russia", internal documents show what American "protection" in practical terms means.

The Pentagon has conducted biological experiments with a potentially lethal outcome on 4,400 soldiers in Ukraine and 1,000 soldiers in Georgia. According to leaked documents, all volunteer deaths should be reported within 24 h (in Ukraine) and 48 h (in Georgia).

Both countries are considered the most loyal US partners in the region with a number of Pentagon programs being implemented in their territory. One of them is the **\$2.5 billion** Defense Threat Reduction Agency (DTRA) Biological engagement program which includes research on bio agents, deadly viruses and antibiotic-resistant bacteria being studied on the local population.

## **Project GG-21: "All volunteer deaths will be promptly reported"**

The Pentagon has launched a 5-year long project with a possible extension of up to 3 years code-named GG-21: "Arthropod-borne and zoonotic infections among military personnel in Georgia". According to the project's description, blood samples will be obtained from 1,000 military recruits at the time of their military registration physical exam at the Georgian military hospital located in Gori.

The samples will be tested for antibodies against fourteen pathogens:

- Bacillus anthracis
- Brucella
- CCHF virus
- Coxiella burnetii
- Francisella tularensis
- Hantavirus
- Rickettsia species
- TBE virus
- Bartonella species
- Borrelia species
- Ehrlichia species
- Leptospira species
- Salmonella typhi
- WNV

The amount of blood draw will be 10 ml. Samples will be stored indefinitely at the NCDC (Lugar Center) or USAMRU-G and aliquots might be sent to WRAIR headquarters in US for future research studies. Walter Reed Army Institute of Research (WRAIR) is the largest biomedical research facility administered by the U.S. Department of Defense. The results of the blood testing will not be provided to the study participants.

Such a procedure cannot cause death. However, according to the project report, "**all volunteer deaths will be promptly reported (usually within 48 h of the PI being notified)**" to the Georgian Military Hospital and WRAIR.

Mod Military Hospital, FWA00018502, Expiration 17 May 2018  
NCDC, FWA00002781, Expiration 21 February 2018

**Compliance Statement:**

The study will be conducted according to the protocol and in compliance with the regulatory requirements of Georgia and applicable regulatory and U.S. Department of Defense (DoD) requirements.

Page 116 of 144

### GG-21 Final Project Report

occurrences of breaches of confidentiality, destruction of study records, unaccounted for study drug, etc.

Unanticipated problems involving risks to subjects or others should be promptly report (within 48 hours of the PI becoming aware of the problem ) by telephone (301-319-9940), fax (301-319-9961) or email (USArmy.detrick.medcom-wrair.mbx.hspb) to the WRAIR IRB, thru the WRAIR HSPB, and then must be followed-up in writing within 10 working days from awareness of the problem.

Unanticipated problems involving risk to volunteers or others and **all volunteer deaths** will be promptly (usually within 48 hours of the PI being notified) reported to the Military Hospital IRB (Military Hospital of the Ministry of Defense of Georgia 56 Chavchavadze St., Gori, Georgia) by phone ((995) 370270314) or by E-mail ([n\\_chaduneli@yahoo.com](mailto:n_chaduneli@yahoo.com)) and to the WRAIR IRB by phone (001 301 319 9940), by E-mail ([WRAIRDHSP@amedd.army.mil](mailto:WRAIRDHSP@amedd.army.mil)) or by facsimile (001 301 319 9961)

*According to the GG-21 project report, "all volunteer deaths will be promptly reported" to the Georgian military hospital and WRAIR, USA.*

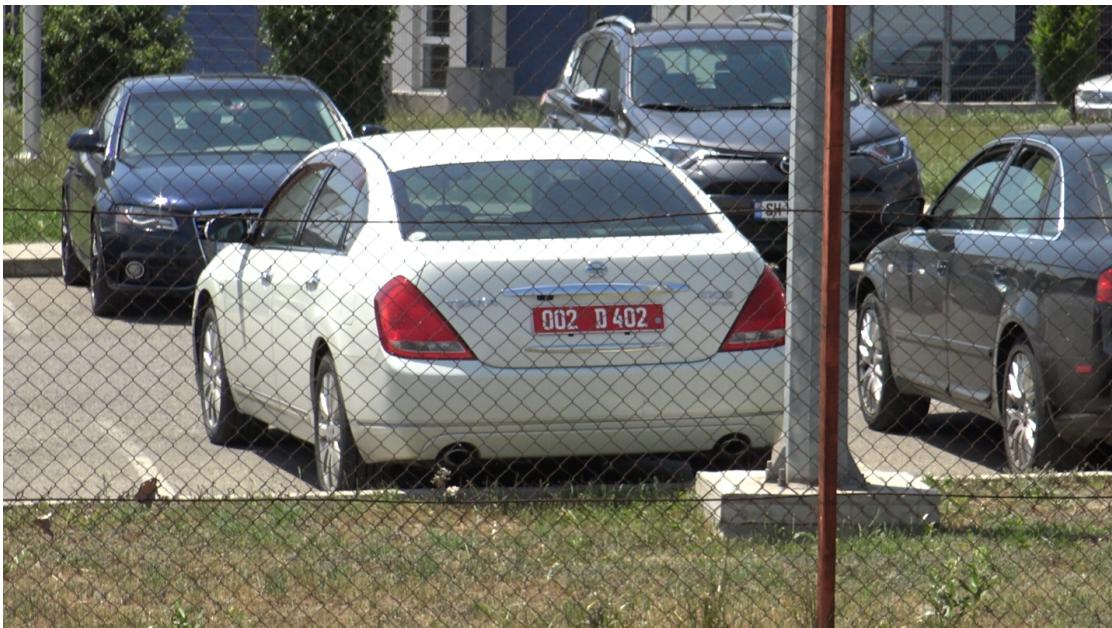

The soldiers' blood samples will be stored and further tested at the Lugar Center, a \$180 million Pentagon-funded facility in Georgia's capital Tbilisi.

The Lugar Center has become notorious in the last years for **controversial activities, laboratory incidents** and scandals surrounding the US drug giant Gilead's Hepatitis C program in Georgia which has resulted in **at least 248 deaths of patients**. The cause of death in the majority of cases has been listed as unknown, **internal documents** have shown.

The Georgian project GG-21 has been funded by DTRA and implemented by American military scientists from a special US Army unit code-named USAMRU-G who operate in the Lugar Center. They have been given diplomatic immunity in Georgia to research bacteria, viruses and toxins without being diplomats. This unit is subordinate to the Walter Reed Army Institute of Research (WRAIR).

The Lugar Center is the \$180 million Pentagon-funded biolaboratory in Georgia's capital Tbilisi.

A diplomatic car with a registration plate of the US Embassy to Tbilisi in the car park of the Lugar Center. US scientists working at the Pentagon laboratory in Georgia drive diplomatic vehicles as they have been given diplomatic immunity. Photos: Dilyana Gaytandzhieva

Documents obtained from the US Federal contracts registry show that USAMRU-G is expanding its activities to other US allies in the region and is “establishing expeditionary capabilities” in Georgia, Ukraine, Bulgaria, Romania, Poland, Latvia and any future locations. The next USAMRU-G project involving biological tests on soldiers is due to start in March of this year at the Bulgarian Military Hospital in Sofia.

**Project UP-8: All deaths of study participants should be reported within 24 h**

The Defense Threat Reduction Agency (DTRA) has funded a similar project involving soldiers in Ukraine code-named UP-8: The spread of Crimean-Congo hemorrhagic fever (CCHF) virus and hantaviruses in Ukraine and the potential need for differential diagnosis in patients with suspected leptospirosis. The project started in 2017 and was extended few times until 2020, internal documents show.

According to the project's description, blood samples will be collected from 4,400 healthy soldiers in Lviv, Kharkov, Odesa and Kyiv. 4,000 of these samples will be tested for antibodies against hantaviruses, and 400 of them – for the presence of antibodies against Crimean-Congo hemorrhagic fever (CCHF) virus. The results of the blood testing will not be provided to the study participants.

There is no information as to what other procedures will be performed except that "serious incidents, including **deaths should be reported within 24 hours**. All deaths of study subjects that are suspected or known to be related to the research procedures should be brought to the attention of the bioethics committees in the USA and Ukraine."

Розповсюдження вірусу Крим-Конго геморагічної гарячки (вірус ККГГ) і хантавірусів в Україні та потенційна потреба диференційної діагностики у пацієнтів з підозрою на лептоспіроз

### **2.6.3. Підходи до діагностики лептоспірозу.**

Лабораторно гострий лептоспірозд людини може бути діагностовано за допомогою ПЛР та серологічних досліджень, зокрема ELISA та реакції мікроаглютинації (МАТ) [14, 39]. Однак антитіла до лептоспір рідко виявляються методом МАТ у перші сім днів передбігу захворювання, а чутливість залишається значно нижчою від 100%, особливо протягом перших 14 днів хвороби [39]. Нещодавно було розроблено метод на основі ПЛР для виявлення ДНК лептоспір в сечі, що дозволяє діагностувати інфекцію в зразках, отриманих на ранньому етапі передбігу хвороби до того, як з'являється можливість виявляти антитіла. Як МАТ, так і ПЛР є доступними в Україні, і попередні дані зі Львова свідчать про те, що лептоспіроз можливо підтвердити за допомогою ПЛР, МАТ або обох методів приблизно у 85% пацієнтів з клінічним діагнозом гострого лептоспірозу (Зубач О., особисте спілкування).

## **III. ПЛАН ДОСЛІДЖЕННЯ**

### **3.1. Цілі**

#### **3.1.1. Основні цілі:**

1. Визначити серопревалентність антитіл до хантавірусів серед 4000 і вірусу ККГГ серед 400 здорових добровольців, залучених установами військових частин та медичних закладів Міністерства оборони України, розташованих у Львові, Харкові, Одесі та Києві, і порівняти ці дані з інформацією у їх медичних картках, розроблених анкетах.

Захворювання, викликані хантавірусами, були вперше виявлені під час Корейської війни, коли близько 1500 військовослужбовців ООН захворіли на невідому фібрильну хворобу з ознаками ураження нирок та геморагічними симптомами. Як показали результати досліджень за період багатьох років, військова діяльність (риття окопів, земельні роботи в полі) призводить до вищого ризику для солдатів, ніж будь-які інші види діяльності. Таким чином, ця популяція може пролити світло на поширеність хантавірусів у навколошньому середовищі та потенціал виникнення захворювання, оскільки Міноборони має військові частини на всій території країни. Okрім того, збір зразків МОЗ локалізований у двох областях з метою забезпечення інформативних оціночних даних про інтенсивність захворювання; у той же час, за результатами діяльності Міноборони будуть отримані оціночні дані щодо рівня ризику інфікування збудниками ККГГ та ГГНС в Україні. Ці дані також дадуть відповідь на запитання про те, чи екстраполяція даних про гризунів та кліщів на національний рівень може надати цінну цільову інформацію.

2. Ідентифікувати антитіла до вірусу ККГГ та хантавірусів у сироватках крові людей використовуючи цільовий підхід до вибірки зразків добровольців.

---

14

*Blood samples from 4,000 Ukrainian soldiers will be tested for hantaviruses. Another 400 blood samples will be tested for CCHF under the DTRA-sponsored Ukrainian Project UP-8.*

Розповсюдження вірусу Крим-Конго геморагічної гарячки (вірус ККГГ) і хантавірусів в Україні та потенційна потреба диференційної діагностики у пацієнтів з підозрою на лептоспіроз

- Дослідження припиняє Міністерство оборони США, інша регуляторна структура уряду США або будь-який регуляторний орган в Україні.

Якщо учасник вирішує відмовитися від участі в дослідженні або виходить із нього, будь-які зібрані в ході дослідження дані, включаючи зразки для лабораторних досліджень, будуть вилучені з аналізу та знищені.

### **3.5. Процедури на випадок відхилення від протоколу**

Весь медичний персонал, що проводить відбір зразків крові та персонал лабораторій

Служби превентивної медицини МО України, який бере участь у лабораторних процесах, до початку дослідження проходитиме навчання з процедур та етики проведення досліджень, суб'єктом якого є людина. У разі ненавмисного включення осіб, що не відповідають критеріям включення, біологічні зразки від них не повинні відбиратися, будь-які зібрани мають бути вилучені з аналізу та знищенні, а особа має бути проінформовано про це. Якщо зразки для лабораторних досліджень від осіб, що не відповідають критеріям включення, вже були відбрані, вони будуть вилучені, а особа – проінформована про це.

У цілому, про відхилення від протоколу, що не впливають на здоров'я учасників, буде повідомлено під час поточного перегляду протоколу та/або в остаточному звіті. Про відхилення від протоколу або неочікувані ситуації, що можуть вплинути на здоров'я, безпеку або благополуччя учасників дослідження, буде негайно повідомлено головному досліднику / менеджеру зі збору даних, українському комітету з біоетики та Агентству зменшення загрози Міністерства оборони США (A33). Про незначні інциденти слід повідомляти протягом 72 годин, а про серйозні, включаючи випадки смерті – протягом 24 годин. Усі випадки смерті суб'єктів дослідження, підозрювані або відомі як такі, що пов'язані з процедурами дослідження, повинні бути доведені до відома комітетів із біоетики в США та Україні. Про будь-які відхилення від протоколу або неочікувані ситуації, які викликають занепокоєння щодо наукової обґрунтованості продовження дослідження, також буде негайно повідомлено головному досліднику, головному співдосліднику, українському комітету з біоетики та A33.

Якщо очікується відхилення від протоколу, головний дослідник та головний співдослідник попередять комітет з біоетики в Україні, а також заздалегідь запросять дозвіл на виняток з протоколу у A33. Усі зміни в протоколі та згоді повинні бути схвалені комітетами з біоетики в Україні до початку їх впровадження.

23

*Project UP-8: "Serious incidents, including deaths should be reported within 24 hours. All deaths of study subjects that are suspected or known to be related to the research procedures should be brought to the attention of the bioethics committees in the USA and Ukraine." Another DTRA contractor operating in Ukraine is CH2M Hill. The American company has been awarded a **\$22.8 million contract** (2020-2023) for the reconstruction and equipment of two biolaboratories: the State Scientific

Research Institute of Laboratory Diagnostics and Veterinary-Sanitary Expertise (Kyiv ILD) and the State Service of Ukraine for Food Safety and Consumer Protection Regional Diagnostic Laboratory (Odesa RDL).

### **US personnel are indemnified for deaths and injuries to the local population**

The DTRA activities in Georgia and Ukraine fall under the protection of special bilateral agreements. According to these agreements, Georgia and Ukraine shall hold harmless, bring no legal proceedings and indemnify the United States and its personnel, contractors and contractors' personnel, for damage to property, or death or injury to any persons in Georgia and Ukraine, arising out of activities under this Agreement. If DTRA-sponsored scientists cause deaths or injuries to the local population they cannot be held to account.

(b) Umbrella Agreement between the Government of the United States of America and the Government of Georgia dated July 17, 1997, Article V, Requirements Related to Assistance.

“3. Georgia shall, in respect of legal proceedings and claims, other than contractual claims, hold harmless and indemnify the United States of America and its personnel, contractors and contractors' personnel, for damage to property, or death or injury to any persons in Georgia, arising out of activities under this Agreement.”

**(a) Agreement between the Government of the United States of America and the Government of the Ukraine. Concerning Assistance to Ukraine in the Elimination of Strategic Nuclear Arms, and the Prevention of Proliferation of Weapons of Mass Destruction dated October 25, 1993, Article VI.**

“(1) Ukraine shall, in respect of legal proceedings and claims, other than contractual claims, hold harmless and bring no legal proceedings against the United States of America and personnel, contractors, and contractors' personnel of the United States of America, for damage or loss of property owned by Ukraine, or death or injury to any personnel of Ukraine, arising out of activities related to work under this Agreement.

(2) Claims, other than contractual claims, by third parties for deaths, injuries, damages, or loss of property in Ukraine, arising out of the acts or omissions of any employees of the United States of America related to work under this Agreement, shall be the responsibility of Ukraine.

Furthermore, according to the US-Ukraine Agreement, claims by third parties for deaths and injuries in Ukraine, arising out of the acts or omissions of any employees of the United States related to work under this Agreement, shall be the responsibility of Ukraine.

## US bioweapons labs CONFIRMED as deep state sets stage for biowar false flag event to be blamed on Russia

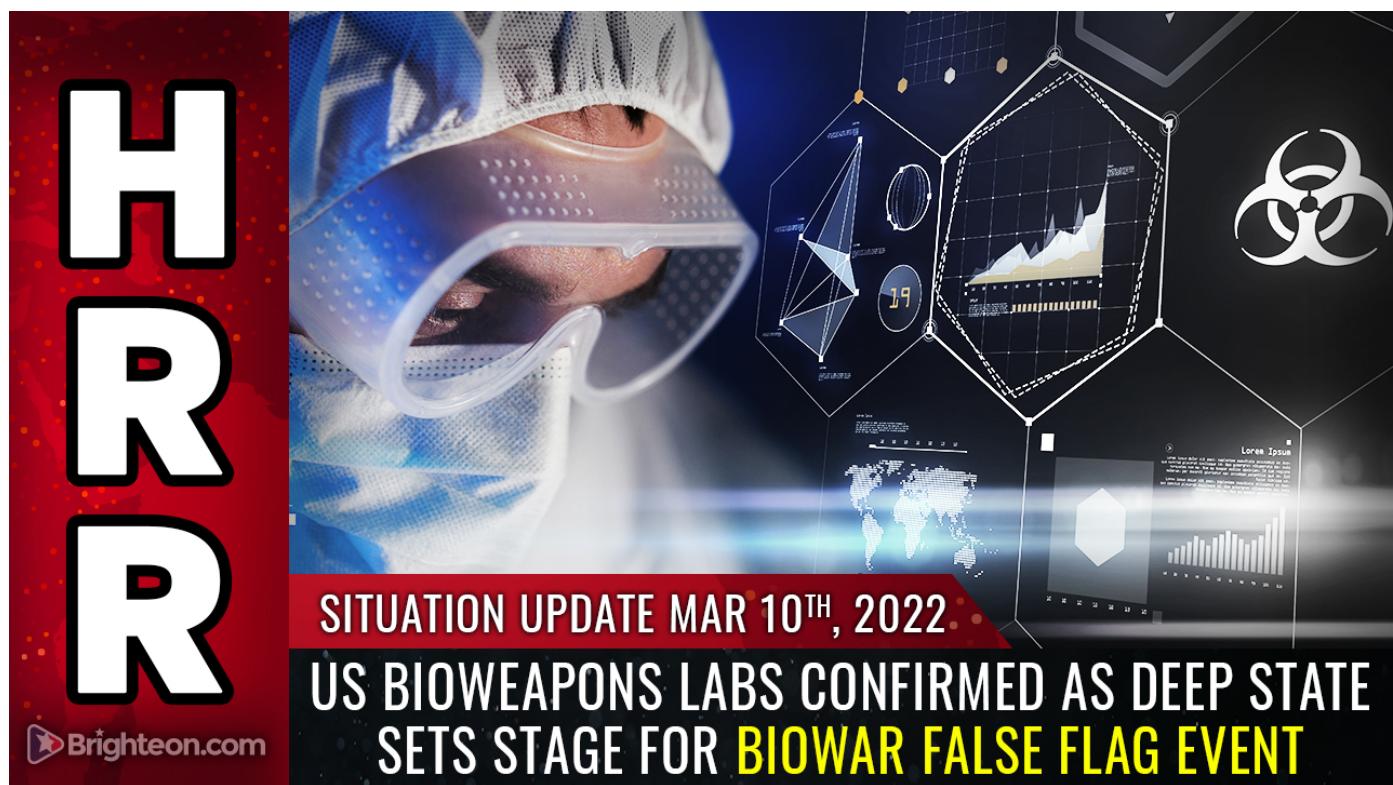

BY HEALTHRANGER // 2022-03-10

 Mastodon

 Parler

 Gab

+

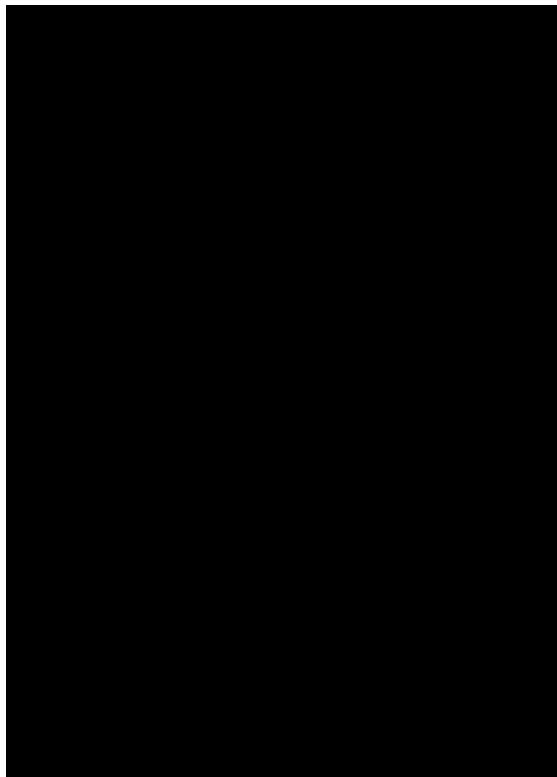

Earlier this week, US Under Secretary of State Victoria Nuland [publicly confirmed the presence of US-funded bioweapons laboratories](#) in Ukraine. She even warned that Russia might seize the facilities and launch a biological weapons false flag attack on the world to blame America. This is a direct confirmation that the US-funded labs contain dangerous biological weapons. Otherwise, why would Nuland be concerned if Russia seized the labs? Nuland was being questioned by

US Sen. Marco Rubio, a known RINO and war machine collaborator. It appears that Rubio and Nuland rehearsed this exchange and performed it for public consumption **in order to set the stage for a US false flag bioweapons release that will be blamed on Russia.**

U.S. Under Secretary of State Victoria Nuland says Washington is working with Ukraine to prevent biological research facilities from falling into Russian hands. She just confirmed every conspiracy theory about the existence of those labs. [pic.twitter.com/ynkd7hW6iK](https://pic.twitter.com/ynkd7hW6iK)

— Ian Miles Cheong (@stillgray) **March 8, 2022**

Nuland: Ukraine Has Biological Research Faci

What's fascinating is that today, State Department spokesperson **Ned Price** publicly *denied* the existence of these biological weapons research facilities in **Ukraine**, claiming it was all part of a "Russian disinformation" campaign. Is Ned Price saying that Victoria Nuland works for the Russians? Are we really to believe that the US has no biological weapons facilities at all? No one believes Ned Price. Not even the US Under Secretary of State.

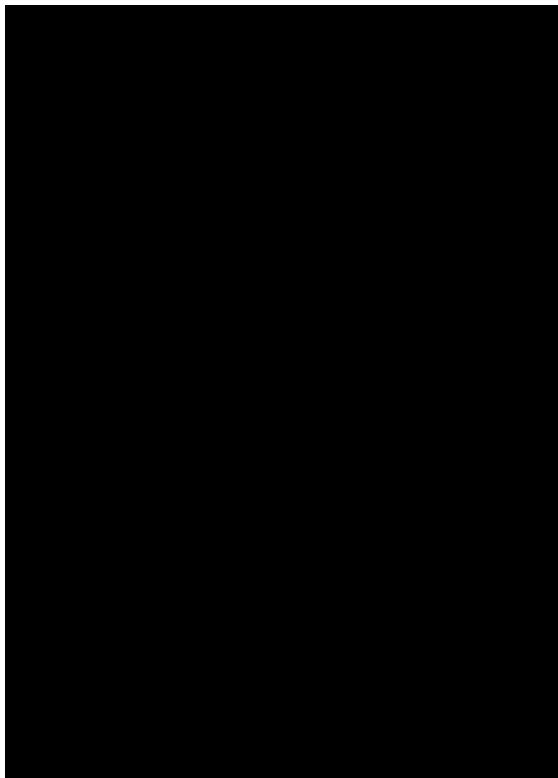

**The US built the SARS-CoV-2 bioweapon and handed it to China**

Never forget the US government -- directed by Fauci and Collins -- violated international treaties and built the SARS-CoV-2 bioweapon via the US DoD and various universities (North Carolina / Baric, etc.). This bioweapon was then handed to China for gain-of-function enhancement, while in the USA, it was used to create depopulation "vaccines" modeled on the deadly spike protein. The "plandemic" was then released upon the world via US and China deep state operatives, while the controlled media pushed a psychological terrorism campaign to drive people into masking, social distancing, lockdowns and domestic economic destruction. This was followed by strong coercion for "vaccine" injections which turned out to be mRNA gene therapy transhumanism jabs designed to exterminate billions of human beings. This was all done by the United States and China, without any involvement from Russia, just for the record. So when the USA now points to Russia and screams, "War crimes!" it all seems incredibly absurd. Laughable.

## The cover story for next next bioweapon / toxic nanoparticle dumping onto humanity?

Whether the bioweapons labs are actually producing self-replicating viruses or just really dangerous nanoparticles is almost irrelevant at this point. Either way, it's now clear they plan to dump their bioweapons onto the populations of the world while blaming Putin for a bioweapons false flag operation. The release of this bioweapon / nanoparticle is probably imminent. That means the globalists are really moving into what they hope will be the final phase of their extermination agenda, and **it's likely to be accompanied by a global financial reset, cyber warfare false flags and the complete suspension of elections and the Bill of Rights**. This is the direction in which things are moving right now, and while there may still be time to stop the worst case scenario from being unleashed, there isn't currently any convincing evidence that the "white hats" are in charge. All we see on a daily basis is Joe Biden deliberately unleashing economic destruction on America while his handlers (Obama, etc.) are plunging the US into what they hope will be a nuclear exchange with Russia. Yes, they are **death cultists** and they are hoping to achieve a scenario where Russia nukes the United States into oblivion. This is the goal of Obama, Biden and the top Democrats who currently appear to be in charge of US "policy" if you can even call it that. Today's Situation Update podcast covers this in more detail, including some good news about why we can dismiss the psychological terrorism

attempts by the complicit media and the "science" authorities (who are all fraudsters and liars, it turns out). The bioweapons discussion starts at 36:40. The first 36 minutes contain a special discussion specifically directed to the audience, and most people won't understand what we're talking about unless they are frequent listeners: [Brighteon.com/6d56b21a-24f0-4a65-b344-aeefad23913d](https://Brighteon.com/6d56b21a-24f0-4a65-b344-aeefad23913d)

## EXCLUSIVE: Deleted Web Pages Show Obama Led an Effort To Build a Ukraine-Based BioLab Handling

# ‘Especially Dangerous Pathogens’.

Recovered by The National Pulse, the article raises serious questions about U.S. government activity in Ukraine, stretching back almost two decades.

by Natalie Winters · March 8, 2022

A deleted web article recovered by The National Pulse reveals that former President Barack Obama spearheaded an agreement leading to the construction of biolabs handling “especially dangerous pathogens” in Ukraine.

The news comes on the same day that Biden regime apparatchik Victoria Nuland told the U.S. Senate that the American government is concerned about biological research facilities falling into Russian hands as a result of the ongoing conflict in Eastern Europe.

**EDITOR'S NOTE:** Real news like this is difficult and sometimes even dangerous. Please consider joining our community today to support and protect our work, and to help us do more of it. Thank you.

Originally posted on June 18th, 2010, the article “Biolab Opens in Ukraine” details how Obama, while serving as an Illinois Senator, helped negotiate a deal to build a level-3 bio-safety lab in the Ukrainian city of Odessa.

The article, which also highlighted the work of former Senator Dick Lugar, was additionally included in Issue No. 818 of the United States Air Force (USAF)

## Counterproliferation Center's Outreach

### Journal.

“Lugar said plans for the facility began in 2005 when he and then-Senator Barack Obama entered a partnership with Ukrainian officials. Lugar and Obama also helped coordinate efforts between the U.S and Ukrainian researchers that year in an effort to study and help prevent avian flu,” explained author Tina Redlup.

### Biolab Opens In Ukraine

by Tina Redlup  
June 17, 2010

U.S. Sen. Dick Lugar applauded the opening of the Interim Central Reference Laboratory in Odessa, Ukraine, this week, announcing that it will be instrumental in researching dangerous pathogens used by bioterrorists.

The level-3 bio-safety lab, which is the first built under the expanded authority of the Nunn-Lugar Cooperative Threat Reduction program, will be used to study anthrax, tularemia and Q fever as well as other dangerous pathogens.

“The continuing cooperation of Nunn-Lugar partners has improved safety for all people against weapons of mass destruction and potential terrorist use, in addition to advancements in the prevention of pandemics and public health consequences,” Lugar said.

Lugar said plans for the facility began in 2005 when he and then Senator Barack Obama entered a partnership with Ukrainian officials. Lugar and Obama also helped coordinate efforts between the U.S and Ukrainian researchers that year in an effort to study and help prevent avian flu.

The Nunn-Lugar Act, which established the Cooperative Threat Reduction Program, was established in 1991. Since that time it has provided funding and assistance to help the former Soviet Union dismantle and safeguard large stockpiles of nuclear, chemical and biological weapons. The program has also been responsible for destroying chemical weapons in Albania, Lugar said.

USAF JOURNAL.

A 2011 report from the U.S. National Academy of Sciences' Committee on Anticipating

Biosecurity Challenges of the Global Expansion of High-Containment Biological Laboratories explained how the Odessa-based laboratory “is responsible for the identification of especially dangerous biological pathogens.”

**MUST READ:** [The British Government Believes COVID-19 Came From the Wuhan Lab: Report.](#)

“This laboratory was reconstructed and technically updated up to the BSL-3 level through a cooperative agreement between the United States [Department of Defense](#) and the Ministry of [Health](#) of Ukraine that started in 2005. The collaboration focuses on preventing the spread of technologies, pathogens, and knowledge that can be used in the development of biological weapons,” the report continues.

“The updated laboratory serves as Interim Central Reference Laboratory with a depozitarium (pathogen collection). According to Ukrainian regulations, it has a

permit to work with both bacteria and viruses of the first and second pathogenic groups,” explains the report.

A separate document detailing Ukraine's biolab network from the BioWeapons Prevention Project outlines in greater detail the scope of pathogens the facility has conducted research with.

Among the viruses the lab studied were Ebola and “viruses of pathogenicity group II by using of virology, molecular, serologica and express methods.”

Additionally, the lab provided “special training for specialists on biosafety and biosecurity issues during handling of dangerous biological pathogenic agents.”

## UKRAINE

**Table 1. BSL-3 facilities in Ukraine<sup>27</sup>**

Name and location of the host institution	Name/size of BSL-3 laboratory	Scope and general description of activities
State Institution “Mechikov Ukrainian Scientific and Research Antiplague Institute,” 2/4, Tserkovna str, Odesa, 65003	Laboratory of detection of biological pathogenic agents: bacteriology department: 299.97m <sup>2</sup> ; virology department: 119.3m <sup>2</sup>	a) detection and identification of viruses of pathogenicity group I*: Marburg virus, Ebola virus, Lassa virus, Junin virus, Machupo virus, Simian virus B virus, Crimean-Congo hemorrhagic fever virus; and viruses of pathogenicity group II* by using of virology, molecular, serological and express methods. Detection and identification of bacteria of pathogenicity groups I and II*: <i>Yersinia pestis</i> , <i>Bacillus anthracis</i> , <i>Brucella spp</i> , <i>Francisella tularensis</i> etc by use of bacteriological, molecular and serological methods; b) identification of unclassified agents; c) storage and maintenance of museum strains of microorganisms of pathogenicity groups I-II*; d) study of molecular and genetic characteristics of agents in pathogenicity groups I-II*; e) special training for specialists on biosafety and biosecurity issues during handling of dangerous biological pathogenic agents

BIOLAB'S PATHOGENS.

The unearthed biolab facility follows intense scrutiny over the U.S. government's decision to fund risky, "gain-of-function" research in Wuhan at a Chinese Communist Party-run lab with military ties.

## Complottheorie wordt binnen enkele dagen waarheid

vrijdag, 11 maart 2022 16:10 Hits: 13074

**Meestal duurt het wel een tijdje voordat nieuws dat wordt bestempeld als ‘complottheorie’ waar blijkt te zijn.**

Maar de ‘complottheorie’ over de Amerikaanse biolabs in Oekraïne heeft niet lang stand gehouden.

Volgens de mainstream media maakt minister Wopke Hoekstra zich grote zorgen:

(<https://www.telegraaf.nl/nieuws/658729037/hoekstra-complottheorie-over-biowapens-kan-veel-ellende-veroorzaken-in-oekraine>)

Dit omdat Rusland en ook China volgens hem een complottheorie verspreiden dat er zich in Oekraïne door Amerika opgezette en gefinancierde biolabs zouden bevinden waar druk wordt geëxperimenteerd met biologische wapens.

Volgens Hoekstra verspreiden ze dit verhaal zodat ze later zelf een aanval kunnen uitvoeren met biologische wapens en Oekraïne en Amerika daarvan de schuld geven.

Verder claimen Rusland en China dat Amerika kort voor de vijandelijkheden begonnen in Oekraïne geprobeerd zouden hebben om die biowapens weg te halen.

Allemaal onzin en complottheorieën volgens Hoekstra. Ondertussen heeft de Amerikaanse onderminister Victoria Nuland toegegeven (<https://www.dagelijksstandaard.nl/2022/03/schok-amerika-geeft-toe-er-zijn-biolabs-in-oekraine-we-maken-ons-zorgen-dat-de-russen-ze-overnemen/>) dat die laboratoria inderdaad bestaan, maar dat daar alleen maar onderzoek wordt gedaan voor ‘het goed van de mensheid’ en dat dit niets met biowapens te maken heeft. En dat ze zich ook, net als Hoekstra, grote zorgen maakt dat die laboratoria in Russische handen vallen.

Dat het verhaal over de biolabs waar alleen maar goed werk wordt verricht een leugen is blijkt uit een artikel in de National Pulse (<https://thenationalpulse.com/2022/03/08/obama-led-ukraine-biolab-efforts/>), waar uit een eerder, maar inmiddels verdwenen, artikel uit 2010 blijkt dat niemand minder dan Barack Obama opdracht gaf om in Oekraïne een project uit te voeren met een biolab waar met zeer gevaarlijke pathogenen gewerkt zou worden.

Dit is ook volledig in lijn met wat Rusland en China claimen, namelijk dat het om een militair biologisch programma gaat. Verder zeggen de Russen dat ze bewijs hebben dat de regering van Oekraïne opdracht zou hebben gegeven tot vernietiging van alle levensgevaarlijke ziekteverwekkers.

En dan blijkt opeens dat de WHO ook opdracht heeft gegeven (<https://dvhn.nl/buitenland/WHO-waarschuwt-Oekraïne-om-ziekteverwekkers-te-vernielen-27531928.html>) om levensgevaarlijke ziekteverwekkers te vernietigen.

*De Wereldgezondheidsorganisatie (WHO) heeft Oekraïne geadviseerd om gevaarlijke ziektekiemen die zijn opgeslagen in onderzoeks laboratoria in het land te vernietigen. De organisatie deed dit uit vrees dat de pathogenen zouden vrijkomen door eventuele oorlogsschade aan de gebouwen, meldt de WHO aan persbureau Reuters. Ze zouden zich dan kunnen verspreiden onder de bevolking en ziekten veroorzaken.*

*De WHO wilde niet zeggen wanneer ze haar aanbeveling deed of om wat voor ziektekiemen het gaat. Of Oekraïne het advies heeft opgevolgd is evenmin bekend.*

Ondertussen wil Rusland voor later vandaag een zitting bij de VN veiligheidsraad (<https://www.zerohedge.com/geopolitical/russia-calls-un-security-council-meeting-over-biological-activities-ukraine>) om bovenstaande te bespreken en doen er verhalen de ronde dat vandaag volgens het Kremlin iets heel moois zal opleveren voor de wereld (<https://netforum.nl/index.php?topic/1279-the-kremlin-issued-a-statement-late-today-friday-evening-will-be-beautiful-for-the-whole-world/>) en dat zou dan heel goed met bovenstaande te maken kunnen hebben.

In de onderstaande video zie je Tucker Carlson in gesprek met Glen Greenwald en beiden verbazen zich over het feit dat journalisten tegenwoordig gewoon hun werk niet meer doen.

Als de CIA en/of het Pentagon zegt dat de Amerikanen geen gevaarlijke biolabs exploiteren in Oekraïne, dan is dat voor de huidige generatie journalisten en factcheckers 'bewijs'. De CAI en het Pentagon zeggen het, dus is het waar.

Verder spreken ze over het bizarre feit dat iedereen die een afwijkende mening durft te hebben van het gangbare mainstreamverhaal wel een Russische agent moet zijn.

Greenwald geeft de Amerikaanse overheid in theorie nog het voordeel van de twijfel door te zeggen dat ze al die gevaarlijke ziekteverwekkers in Oekraïne wel met de beste bedoelingen ontwikkelen, maar niet beseffen dat ze wel degelijk op die manier bezig zijn met biowapens.

Even later haalt hij datzelfde argument weer onderuit op de vraag van Tucker: Waarom doen ze dit in Oekraïne en niet in een wetenschappelijk beter uitgerust land als Duitsland of Israël?

Waarop Greenwald komt met de opmerking dat ze dit dan zouden kunnen doen omdat Oekraïne aan Rusland grenst en ze dit land zien als een grote bedreiging en omdat ze Rusland zouden willen uitdagen.

Tucker Carlson en Glenn Greenwald over biolabs Oekraïne

Videolink ([https://vk.com/video516205560\\_456239419](https://vk.com/video516205560_456239419))

Wanneer Hoekstra waarschuwt voor een komende 'false flag' aanval met biowapens door de Russen, dan moet je de zaak gewoon omdraaien en dat zit je waarschijnlijk helemaal goed.

Wat we misschien binnenkort gaan zien is een herhaling van het Douma recept, waarbij de Syrische president Assad de schuld kreeg van een chemische aanval op zijn eigen burgers.

Uit een eerder artikel:

Voor iedereen die een beetje het Syrië verhaal volgt/-de was het een vreemde gebeurtenis, want Assad had de strijd om Douma al gewonnen, dus waarom zou hij een gifgasaanval inzetten tegen de eigen bevolking, waardoor hij zeker wist dat er vergeldingsaanvallen vanuit het westen zouden volgen? Hetgeen dan ook prompt gebeurde door luchtaanvallen van Engeland, Frankrijk en Amerika.

Begin dit jaar kwam de OPCW tot de conclusie (<https://www.trouw.nl/nieuws/opcw-gifgas-gebruikt-bij-aanval-op-douma~bf183a49>) dat er chemische wapens waren gebruikt in Douma:

*De Organisatie voor het Verbod van Chemische Wapens (OPCW) heeft gegronde redenen om aan te nemen dat het gifgas chlorine is gebruikt tijdens de aanval op het Syrische stadje Douma, in april vorig jaar.*

*Dit staat in een rapport dat organisatie heeft ingediend bij de VN Veiligheidsraad. Het betreft de aanval in april 2018 door de Syrische overheid op de Syrische opstandelingen, die tot dan toe de controle uitoefende over Douma, ten zuiden van de Syrische hoofdstad Damascus. In het rapport staat niet welke van de strijdende partijen het gifgas heeft ingezet. Al eerder claimden diverse partijen dat de troepen van president Assad gifgas gebruikten tijdens de aanval, die volgens hulpverleners aan veertig mensen het leven kostte.*

De conclusie van het 106 pagina grote verslag in maart dit jaar was dat er chloor was gebruikt, afkomstig uit een tweetal cilindervormige containers die vanuit de lucht naar beneden waren gegooid. (<https://al-bab.com/blog/2019/03/opcws-douma-investigation-points-gas-cylinders-dropped-air>) Aangezien dit alleen door Assad gedaan kan zijn, omdat de rebellen niet over een luchtmacht beschikken, was hiermee Assad impliciet schuldig verklaard, ook al werd dat niet exact zo gezegd in het rapport.

Echter, een groep onafhankelijke onderzoekers bestaande uit wetenschappers en ingenieurs van de Working Group on Syria, Propaganda and Media (WGSPM) (<https://syriapropagandamedia.org/about>), kwam in mei dit jaar tot een heel andere conclusie, gebaseerd op een tussenrapport (<https://syriapropagandamedia.org/wp-content/uploads/2019/05/Engineering-assessment-of-two-cylinders-observed-at-the-Douma-incident-27-February-2019-1.pdf>) zoals dat door datzelfde OPCW was vrijgegeven:

*"The dimensions, characteristics and appearance of the cylinders, and the surrounding scene of the incidents, were inconsistent with what would have been expected in the case of either cylinder being delivered from an aircraft. In each case the alternative hypothesis produced the only plausible explanation for observations at the scene." This "alternative hypothesis" is that the cylinders were put there manually.*

Wie het complete verhaal wil lezen kan dat hier doen (<https://www.wsfs.org/en/articles/2019/05/28/doum-m28.html>), maar waar het kort door de bocht op neer komt is dat hier sprake is van een in elkaar gedraaid scenario (wat wij ook al schreven in april vorig jaar en wat aan het einde van dit artikel te vinden is), waarbij Assad de schuld moet krijgen en er helemaal geen gascontainers met chloor vanuit de lucht naar beneden zijn gegooid, maar daar handmatig zijn neergelegd zonder dat er verder sprake is van slachtoffers.

(<https://www.addtoany.com/share#url=https%3A%2F%2Fniburu.artikelen%2Fwereld%2F17213-complottheorie-wordt-binnen-enkele-dagen-waarheid&title=Complottheorie%20wordt%20binnen%20enkele-dagen-waarheid>)
